

ENTERPRISE CLOUD TRANSFORMATION

Migrate your business to the Cloud.
Safely, seamlessly, scalably.

INFOPULSE CLOUD SERVICES

Infopulse offers a full scope of **Cloud Transformation Services** to help CIOs ensure reliable, smooth and cost-efficient implementation, migration, and maintenance of their IT infrastructure.

Together with you, we will develop **a transformation roadmap** to introduce cloud into your enterprise the right way, ensuring all complexities and risks of cloud adoption are taken into account.

What we offer

Cloud Security

- Consulting on **GDPR** and **ISO 27001** compliance
- Cloud GRC consulting to help you move to the cloud securely, without putting cloud data at risk
- In-depth analysis of your cloud infrastructure, recommending and implementing security enforcement measures

Business Value: Protected customers' data, secure business applications, increased customer confidence and satisfaction, ensured business continuity, zero government penalties

Cloud DevOps

- Designing and integrating CI/CD, release management, automated testing, and other processes in the cloud
- Utilizing an extensive toolset at all stages of solution delivery to achieve the best results

Business Value: Decreased time to deploy business solutions from days to minutes with increased quality

Cloud Managed Services

- L1, L2, L3 support: 24/7 or on-call, own service desk tool
- Proactive monitoring with an own tool
- Cloud consumption and license management and reporting

Business Value: High availability of services (99.9%); improved support efficiency; reduced maintenance costs

Cloud Transformation Consulting

- Analyzing your business goals and needs to ensure seamless cloud adoption
- Assessing cloud readiness of your existing IT infrastructure and applications
- Estimating expected cloud consumption, reviewing licensing model

Business Value: Clear vision of your future cloud solution and its impact on the business

Cloud Migration & Implementation

- Designing and architecting your cloud solution: hybrid, private, public
- Planning proper migration strategy and approach: rehost, replatform, rearchitect etc.
- Implementing the designed cloud solution

Business Value: A fully functioning, scalable and maintainable cloud solution

Business Value

- Improved quality and reliability of services, reducing the overall need for tech support calls
- Cost savings on infrastructure support
- Prevention of IT incidents, early detection of problems
- Improved security of infrastructure and web applications
- Improved infrastructure and DB performance for critical business applications: Dynamics CRM, SharePoint, internal tools

QQI

Quality and Qualifications Ireland
Dearbhú Cáilíochta agus Cáilíochtaí Éireann

While following our mission on improving the level of the national education, we developed a comprehensive long-term IT strategy.

We wanted to enhance internal processes, update and unify our infrastructure and facilitate system support. Infopulse has become our primary partner and solutions provider.

Infopulse was using the Microsoft technology stack with the addition of various components by Google, ensuring flexibility and maintainability of new systems. We are confident to recommend Infopulse as a strong, reliable and expert partner.

Ray O'Neill,
Head of ICT
