

Smart Update

Pre-packaged Applications Service

What is Smart Update

Smart Update is a pre-packaged applications service that offers a catalog of updates to the Top 100+ most widely used business apps.

Whether you are a small or mid-size business, an enterprise or a service provider, you will benefit from Smart Update service by always keeping your apps up-to-date, saving your effort and budget.

The service provides you with the most complete library of deployment-ready application packages in all current versions, available architectures, multiple languages, and app packaging technologies. All of the application packages comply with the industry best practice standards and are enabled for easy customization.

Why Smart Update

	Security	<ul style="list-style-type: none">• Ensure your application landscape is always secure and up-to-date with all the latest security patches and updates• All packages are prepared to work in locked-down environments minimizing security risks

	Flexibility	<ul style="list-style-type: none">• All packages are available in multiple formats and languages• Various delivery options are supported• Adding any custom applications to the catalogue by request
	High Quality	<ul style="list-style-type: none">• The catalogue is created according to the best practices• Tested on all supported platforms• Ready for deployment via MS SCCM or other systems
	Cost Reduction	<ul style="list-style-type: none">• Dramatically reduce effort and costs by using the catalogue of shared application packages• Maintain packages quality and security without having to hire a packaging team
	24/7 Support	<ul style="list-style-type: none">• Full documentation, including interactive support• Processing all types of requests via Helpdesk• Support of the most used application formats, including MSI, App-V, Mac OS

For Service Providers: Open New Business Opportunities with Smart Update!

Provide Smart Update service for your end customers, resell packages or integrate them to your services or solutions delivered to third parties.

Service includes only applications available for free download according to application vendor policy.

KEEP APPLICATIONS up to date and reduce costs

How it works

Use Smart Update in 3 simple steps

01 Request the catalogue of the most common, up-to-date and ready for deployment application

02 Subscribe for the service and receive regular updates within the subscription period

03 Request specific customizations to the packages and track the packaging tasks with Packaging Process Portal (P-Cube)

How to buy

Choose the best matching pricing option:

SMBs

Pay only for the applications you choose

- Pick only the applications you need
- Receive notifications and download packages by personal link
- Per app pricing and purchase

Enterprises

Unlimited access to the full catalogue of applications

- An annual subscription with flexible delivery models:
 - 24/7 Customer access to Infopulse package Storage
 - Automatically Upload Package to Customer's Defined Storage
- Customizable email notifications

Who we are

Infopulse, part of Nordic IT group EVRY A/S, is an international vendor of Information Technology services and solutions. The company operates one of the biggest application packaging factories in Europe.

During 14 years of delivering application packaging services to more than 150 happy clients worldwide, Infopulse has accumulated vast experience in the domain. This resulted in the development of our own solutions and tools that streamline the application packaging process at enterprises. Today, the software packaging portfolio of Infopulse contains such instruments, as [PACE Suite](#), the fastest application packaging tool for building MSI and virtual packages; [Smart Update](#), a catalogue of the top 100+ most frequently used software packages; [P-CUBE](#) (Packaging Process Portal), a web-based solution that enables full control and visibility over the entire packaging workflow.
